

Dräger FPS 7000
Full Face Mask

The Dräger FPS 7000 full face mask series is characterised by a high degree of safety and optimum wearing comfort. Thanks to its proven design and the different sizes, it offers a tight and comfortable fit. Multiple front port options ensure secure use with SCBA, CCBA, (P)APR and airline systems.

Dräger

Technology for Life

Dräger FPS 7000

Large visor (180° angle)
Optimal view during a wide range of tasks. Made from Polycarbonate (optionally also with coating).

5-point head harness / adapter
Simple donning and doffing. Also available with S-fix adapter for use as mask-helmet- combination.

Comfortable and secure fit
Double sealing frame with threefold sealing edges. Secure protection and leak-tight fit for different face shapes by 3 mask body sizes.

Versatile connection
Offers compatibility and secure applicaton with Rd40-filter, PAPR, SCBA or Airline Systems.

Accessories
Communication units
FPS-COM 5000 / FPS-COM 7000,
FPS-Com Voice.
IMD and UCF FireCore.

Dräger FPS 7000

RP Version

5-point head harness
Simple donning and doffing.

Large visor with wiper
Made from Polycarbonate with antiscratch coating, integrated wiper for fog-free view.

Comfortable and secure fit
Double sealing frame with threefold sealing edges. Secure protection and leak-tight fit for different face shapes by 3 mask body sizes.

Accessories
Communication units FPS-Com Voice or FPS-COM 5000

Designed for CCBA applications
Special RP front port to be combined with CCBA Dräger BG ProAir.

Benefits

Exceptional field of vision

The FPS 7000 gives you an exceptionally wide, distortion-free view through its large polycarbonate visor – even in the most challenging conditions. A well-engineered air circulation reduces fogging, so your vision stays clear when it matters most. The visor is available with an anti-scratch coating for enhanced mechanical protection and greater chemical resistance. The result: unobstructed orientation and faster decision-making, whether in thick smoke or confined spaces.

Secure fit for all face shapes

Faces differ – your mask should adapt. A double sealing frame with threefold sealing edges conforms securely to almost all face shapes, while the ergonomic head harness distributes pressure evenly for lasting comfort. Choose between a hypoallergenic silicone or EPDM mask body in three sizes for a personalised fit. Donning and doffing takes just seconds thanks to the intuitive head harness design – keeping you ready when time is critical.

Full system integration across all applications

With multiple front ports and wearing options, the FPS 7000 fits securely into your respiratory protection system. Combine it with a self-contained breathing apparatus, repiratory filter, powered air purifying respirator or airline system.

The FPS 7000 RP variant extends this flexibility to closed-circuit breathing apparatus such as the BG ProAir - purpose-built for long-duration missions. An integrated wiper and an optional hydration connector keep you focused during extended deployments. One mask family for every operational profile.

Furthermore, the full face mask connects directly to helmets of the Dräger HPS series via the purpose-built S-fix adapter. This two-point attachment creates a stable, integrated unit of helmet and mask.

Modular design - adaptable to meet special requirements

The FPS 7000 is not only safe and comfortable to wear, but can also be flexibly adapted to your requirements. Choose between solutions for basic tactical radio communication or more integrated systems offering also voice amplifier or even handsfree team communincation - clear communication during every operation. Furthermore, the Dräger FPS-Com Voice, FPS-COM 5000 and FPS-COM 7000 communication systems adapt seamlessly to the design and ergonomics of the mask.

Dräger UCF FireCore and FPS In-Mask-Display

Better orientation and faster situational assessment – directly in your field of vision. The Dräger UCF FireCore is a helmet-mounted thermal imaging camera consisting of two components: a camera module attached to the helmet and the FPS In-Mask-Display (FPS IMD) integrated into the FPS 7000 (not compatible with FPS 7000 RP version). Both components connect wirelessly, giving you a continuous thermal image without taking your hands off the job. The result: quicker orientation and improved situational awareness in zero-visibility conditions.

System Components

D-1843-2025

Dräger PSS AirBoss

The Dräger PSS AirBoss offers best in class ergonomics and is one of the lightest weight breathing apparatus for firefighting. Lessons learned from firefighters around the world as well as latest innovations in technology have led us to design an even safer and cleaner SCBA system that enables you to breathe more easily and for longer.

System Components

D-609-2022

Dräger BG ProAir

Specially designed for longer durations: The Dräger BG ProAir is a positive pressure closed circuit breathing apparatus that combines uncompromising safety with the highest level of breathing and carrying comfort. Easier to carry, easier to breathe - giving you more time to get the job done and return safely.

D-1552-2022-D-1550-2022

Dräger UCF FireCore

The Dräger UCF FireCore hands-free thermal imaging camera gives you a permanent vision of your immediate surroundings, even under the toughest conditions. That allows you to orientate yourself more quickly and safely, while also improving your situational awareness.

D-8700-2019

Dräger FPS-COM 5000

Because there is no time for misunderstandings in an emergency: The Dräger FPS-COM 5000 communication unit has been specifically developed for the full face mask Dräger FPS 7000 and ensures clear communication through a voice amplifier unit or radio device – even under extreme conditions.

D-5723-2025

Dräger FPS-Com Voice

The Dräger FPS-Com Voice mask-integrated communication unit significantly improves voice communication when using a breathing apparatus, thanks to its optimised voice capture and output. The communication unit is simple to use, easy to retrofit on the mask, and completely maintenance-free.

System Components

D-9339-2014

Dräger C-C440

Control unit with large Push-to-Talk button for easy handling of the radio transmitter. Tough and robust design according to IP67 / MIL-STD-810G standards. Specially designed for deployments using chemical protective suits. ATEX versions available.

D-2244-2022

Dräger HPS 7000

The multipurpose Dräger HPS 7000 firefighter's helmet is in a class of its own, thanks to its innovative, sporty and dynamic design, ergonomic fit and components which make it a multifunctional system solution. It provides optimum protection during every operation.

D-19710-2025

Dräger HPS SafeGuard

The Dräger HPS SafeGuard is the extremely lightweight universal helmet for fire and rescue services. Its innovative design combines optimal protection with the highest levels of wearing comfort. Its sporty look, light weight and tailor-made accessories make the helmet a real all-rounder for any challenge.

D-1361-2021

Dräger Quaestor 8000

All static and dynamic tests of the Dräger Quaestor 8000 are carried out fully automatically. Controlled by the proven Protector software, each test is carried out intuitively. For you, this guarantees high efficiency through comfort and speed.

Accessories

D-3331-2026

MaBox round

This mask box is designed for safe storage or carrying of Dräger full face masks.

ST-414-2003

Protex mask bag

Instead of a carrying box, the Dräger full face masks can be stored in the “Protex” mask bag.

ST-9504-2006

Spectacle Kit for FPS 7000

For people who wear glasses, the Dräger FPS 7000 can easily be equipped with spectacle kits.

D-43054-2012

Welding Protection FPS 7000

The Welding Protection FPS 7000 provides the optimal solution for safe work when used in combination with a full face mask and suitable filters. It consists of the shield itself, as well as an adapter for established supplementary panels and welding protective filters with a 110 x 90 mm format. Without the adapter, the shield is suitable for lenses with a 4.5" x 5.25" format.

Accessories

ST-14936-2008

Adapter Welding Protection

The adapter for Dräger Welding Protection allows the use of supplementary panels and welding protective filters with a 110 x 90 mm format.

D-44729-2015

DAISYquick cleaning cloths

Cleaning cloths to remove dirt easily.

D-5990-2018

Anti-fog agent Klar-Pilot

Klar-Pilot prevents visors and mask spectacles from fogging even in case of extreme temperature differences.Silicone- and alcohol-free. Available as a gel, fluid or spray.
